

Let Krames help you meet “meaningful use” requirements.

The funding available to you as part of the American Recovery and Reinvestment Act is designed to add efficiency, reduce costs, and ultimately improve health outcomes for all US citizens. The investment you make in health information technology can only achieve its maximum impact when patients are effectively engaged in their health self-management.

Krames has you covered.

Health Outcomes Policy Priority: Engage patients and families

Care Goals: Provide patients and families with timely access to data, knowledge, and tools to make informed decisions and to manage their health.

Eligible Professionals	Hospitals	Stage 1 Measures	Krames Solution
Provide patients with an electronic copy of their health information (including diagnostic test results, problem lists, medication lists, allergies), upon request.	Provide patients with an electronic copy of their health information (including diagnostic test results, problem lists, medication lists, allergies, discharge summaries, procedures), upon request.	At least 80% of all patients who request an electronic copy of their health information are provided it within 48 hours.	Over 2,000 discharge instructions, 3,300 patient education titles, and 2,000 medication information articles ensure patients have the information they need to make informed decisions and manage their health.
	Provide patients with an electronic copy of their discharge instructions and procedures at time of discharge, upon request.	At least 80% of all patients who are discharged from an eligible hospital and who request an electronic copy of their discharge instructions and procedures are provided it.	Krames complete suite of digital emergency medicine, inpatient and out-patient discharge instructions and patient education titles ensure compliance with this measure.
Provide clinical summaries for patients for each office visit.		Clinical Summaries are provided for at least 80% of all office visits.	Krames patient education ensures that clinical summaries are patient-centric and meet the Care Goals surrounding informed decision making and health self-management.

Drive value from your health information technology with Krames patient education.

Going beyond assuring that Krames patient education satisfies “meaningful use” requirements, Krames full line of enterprise-wide patient education solutions serves to make clinical information accessible to patients, helping them:

- ▶ Participate in shared decision-making with providers
- ▶ Better understand options and choose the treatment best suited to their health status and preferences
- ▶ Take a more active role in achieving better health

Choose from a variety of solutions that can support your HIS investment.

Turnkey applications

For clients who want to take advantage of the functionality we've developed specifically to support the patient education process, Krames offers turnkey applications that can interface with your EMR via bidirectional HL7 interfaces.

The **Krames On-Demand**[®] patient education system includes over 5,000 patient education, discharge and medication titles. HL7 interfaces connect with your EMR.

The **streaMed**[™] video application provides point-of-care and at-home access to over 430 patient education videos spanning nine languages.

Krames Exit-Writer[®] emergency medicine discharge program includes content on most common diagnoses, an Rx-Writer and a medication reconciliation tool that can interface with your EDIS.

Krames Go-to-Guides[™], our interactive disease management online workbooks, are dynamic self-management tools.

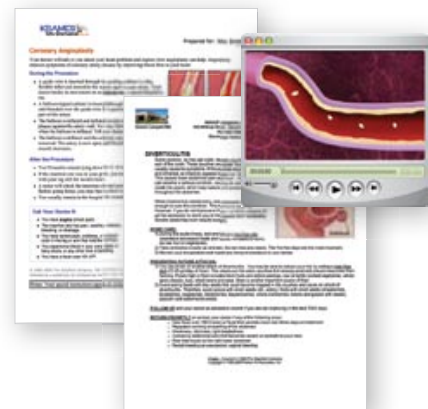

Content Licensing

Krames also offers the most comprehensive library of multimedia patient education that can be fully integrated with your health information systems, including over:

- ▶ 3,300 HealthSheets[™]
- ▶ 2,000 discharge instructions
- ▶ 2,000 medication titles
- ▶ 430 videos

Content in English, Spanish, Russian, Chinese, Vietnamese and eight other languages helps satisfy language requirements. And files are available in XML and streaming video formats with ICD-9, CPT, and MeSH metadata to meet your preferences.

Krames can help you meet your needs.

We've worked with all the major leading EMR providers in developing both interfaced and integrated solutions for our clients. The Krames team is available to work with your internal IS team or your IT vendor to develop a solution that best fits your preferences and budget.
